

As everyone knows, we have to deal with big environmental problems, such as the growing piles of plastic and paper waste.

It's not only a lot of trash to recycle, sadly a lot of it doesn't even make it to the recycling plant and pollutes the environment instead.

We say: Enough is enough!

We at MTG want to make a difference! And we can make a difference!

Let's work together to reach the following aim:

We want to reduce our plastic and paper waste with the help of *Green Breaks*.

Let's have sustainable breaks and make our world a better place!

Here's our *Green Breaks at MTG* plan...

Problem no. 1:

The vending machine

Everybody loves hot drinks, but getting drinks from the machine produces so much plastic waste. This has to change!

From the next school year on, you can use your own **MTG mug**.

You get a thermo mug for €10 and you can use it as often as you like!

But it's not just reusable, what's even better: the drinks will be cheaper when you use it AND you can return it to get a refund whenever you want!

Problem no. 2:

Napkins and paper bags

At our kiosk there is a similar waste problem: You buy a snack and always get paper bags and napkins with it.

Do you *always* need them?
Probably not!

So please only request a napkin or a paper bag if you *really* need it for your snack.

Or why don't you just bring your lunchbox and put your snacks into it?! That's even better!

Let's make MTG green!
